Figure 2 Output Temperature Dependence

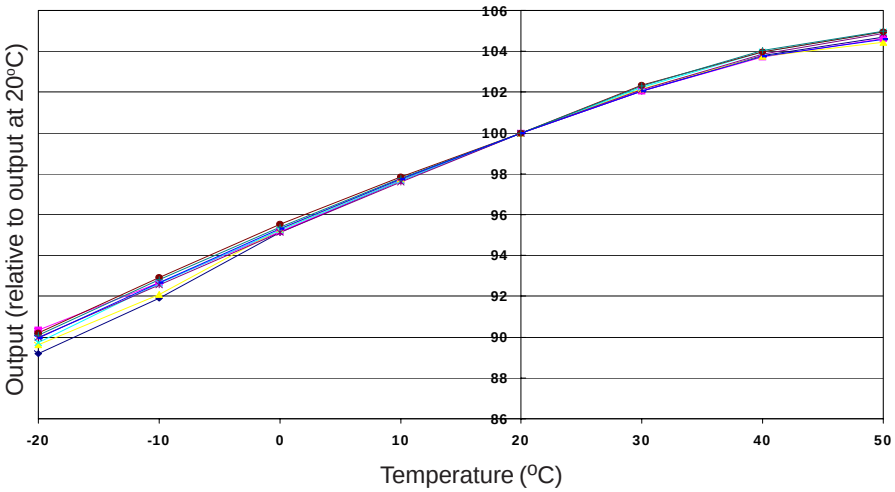

Figure 2 shows the variation in sensitivity caused by changes in temperature.

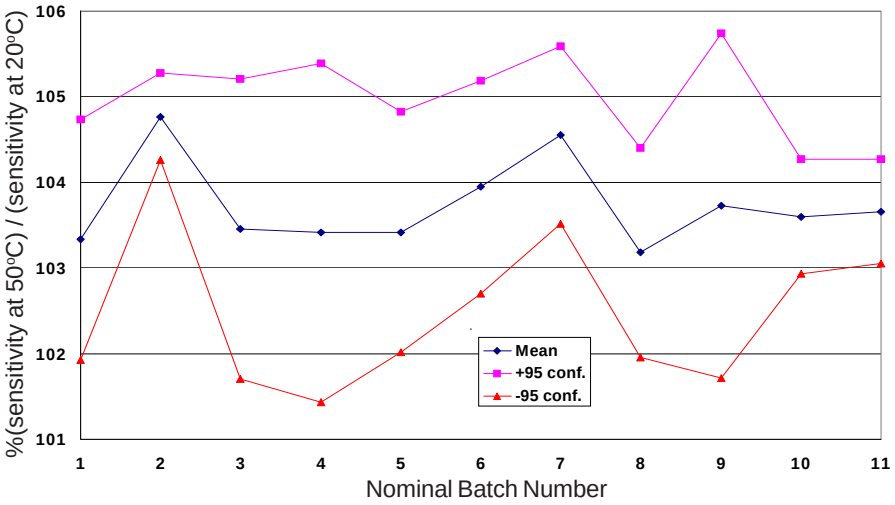
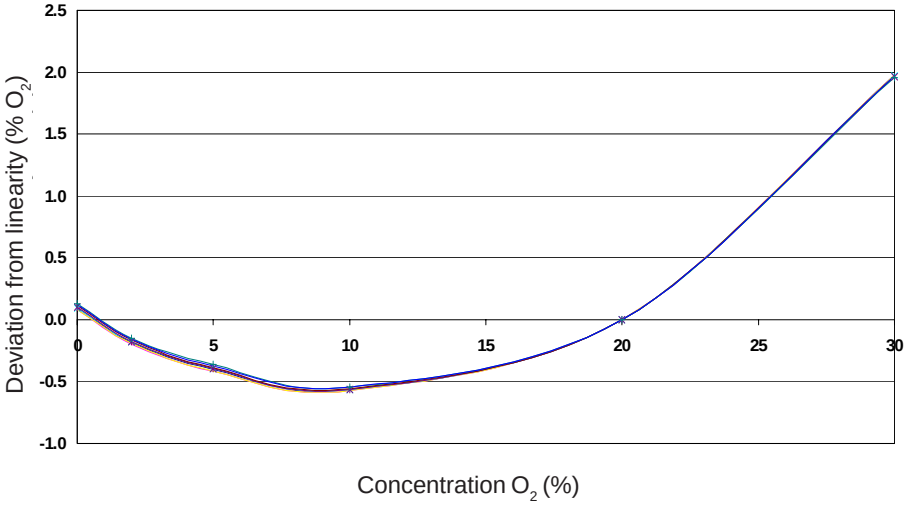
Figure 3 Temperature Dependence Repeatability



This plot of the mean and ±95% confidence intervals for 11 batches shows superior repeatability of the sensitivity dependence from batch to batch, giving confidence when setting temperature compensation in your gas detector.

Figure 4 Non-Linearity



Non-linearity in Alphasense oxygen sensors is a physical effect, and so is very repeatable, as this graph shows, allowing reliable software correction for non-linearity.
